Summary

Java Full Stack Developer with 4.5 years of experience building scalable cloud-native applications using Java 21, Spring Boot 3.2, and Angular 19. Strong in REST APIs, JWT/OAuth2 security, PostgreSQL, Redis, Docker, microservices, CI/CD on Azure, performance optimization, and end-to-end delivery.

Experience

Deloitte USI – Citi Wealth

Mar 2026 – Present

Software Engineer-II

India

- Developed Java 21 and Spring Boot microservices for hedge fund operations covering trade processing, portfolio management, and investor reporting.
- Built REST APIs integrated with downstream systems and financial data sources, reducing manual intervention and improving data exchange.
- Implemented Spring Security with JWT/OAuth2, RBAC, and optimized JPA/PostgreSQL interactions for secure, faster transactions.
- Delivered production-ready services in Agile teams using Docker, Kubernetes, Jenkins, Git, and CI/CD pipelines.

Infosys – Infosys Helix

Feb 2025 – Mar 2026

Senior Software Developer

India

- Developed cloud-native full-stack applications using Angular 19 on the frontend and Java 21 on the backend.
- Implemented Azure B2C authentication with JWT/OAuth2 and secured REST APIs for enterprise access control.
- Led delivery of microservices, Dockerized applications, and VM deployments with Redis caching and PostgreSQL tuning.
- Improved code quality with SonarQube and ESLint, and integrated Figma-based UI into Angular components.
- Integrated an MCP server with Figma to automate code generation and reduce frontend development time.

Tata Consultancy Services – TAP

Nov 2021 – Feb 2025

Software Developer

India

- Developed and maintained full-stack enterprise applications using Java, Spring Boot, Angular, and PostgreSQL.
- Built secure REST APIs with JWT-based authentication, RBAC, validations, and test support within Agile/Scrum teams.
